# Hackathon Day 4

## FRONTEND COMPONENTS FOR YOUR MARKETPLACE

## Clothing Website Template

### Introduction:
*An e-commerce clothing brand is a digital platform that allows people to conveniently shop for the latest fashion and high-quality clothing from the comfort of their homes. Through this platform, customers can browse and order their favorite outfits online, which are then delivered directly to their doorstep. The biggest advantage of e-commerce is that it saves time and energy while freeing people from the hassle of crowded stores and traffic. Additionally, with its global reach, even small brands can showcase their products to international markets, opening up new opportunities for growth.*

### Features:

- **Home Page:** An elegant landing page showcasing featured products and categories.
- **Shop Page:** A dynamic listing of furniture products with filters for price, type, and category.
- **Product Detail Page:** Detailed product information, including images, descriptions, and pricing.
- **Cart:** Enables users to add and manage items for checkout.
- **Checkout Page:** A seamless checkout process to finalize purchases.

### Frontend:

- **Next.js:** Framework for building the application.
- **HTML, CSS, and TypeScript:** Core web technologies for building the structure, styles, and interactivity.
- **React.js:** Used to build reusable components for the user interface.
- **Sanity CMS:** A headless CMS for managing dynamic content (products, categories, orders).
- **Tailwind CSS:** Utility-first CSS framework for styling and building a responsive design.
